

7 Reasons Why?

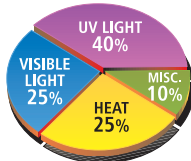

to have window film installed...
on your home, office or automobile.

1 Decrease Heat

Today's solar control window films are highly efficient in reducing the amount of heat that passes through your windows into your home, office or vehicle. For example, clear untreated glass blocks only 14% of the sun's energy while Johnson's SV10 film rejects 82%. Window film controls hot spots and unwanted interior heat creating a comfortable environment while reducing cooling costs.

2 Reduce Fading & Health Risks

Causes of Fading
Source: IFMA

Solar control film blocks up to 99%* or more of UV rays while also significantly lowering heat gain. Reducing these two primary causes of fading helps to protect your valuable home or office furnishings or vehicle's interior. By stopping virtually all the UV rays, window film also provides an effective "sunscreen" for your skin and eyes against the harmful effects of the sun.

*Our clear safety and security films block 98% or more of UV rays.

3 Cut Annoying Glare

Whatever the cause—direct sun, headlights, or reflection from snow, water, or surrounding buildings—glare is not only annoying but can also be dangerous if it obstructs your vision. Like sunglasses, window film does an excellent job of cutting glare.

4 Enjoy Energy Savings

Solar control films can significantly reduce air conditioning usage, ultimately saving you money on your energy bill. The savings will offset the cost of installation over time. Reducing the usage and load on an HVAC system can extend its life. In your vehicle, the resulting benefits of using less air conditioning are better fuel performance and less frequent costly A/C repairs.

5 Increase Safety & Security

Accidents, forces of nature and human threats can instantly turn a pane of glass into dangerous shards. Trident[®] protective films are thicker and stronger than standard films and are available to provide an extra level of protection in case of breakage and increased security for your possessions against smash-and-grab robberies. Defendor[®] anti-graffiti films protect against etching and scratching. Graffiti simply peels off with this removable film.

6 Enhance Appearance

Enhance the exterior of any home, office or automobile and get the look you desire with Johnson's extensive line of solar control and decorative films. Beautiful colors are available in a wide range of shades and levels of privacy (clear to blackout).

7 It's Fast & Easy

Professional installation is quick and simple. There's minimal disruption to your daily lifestyle or work schedule.

The Skin Cancer Foundation recommends this product as an effective UV protectant.
