

ABOUT JOHNSON UNIVERSITY

The Key to Your Future.

Johnson Window Films University installation classes are designed to increase your knowledge and film application skills. Whether you are just beginning your career, brushing up on your installation skills or want to master advanced techniques, we have classes to match your level of experience.

Our basic to advanced installation classes will give you the knowledge and skills to tint like a pro. Our classes are taught by experienced trainers and include hands-on demonstrations and monitored practice sessions as part of each day's session. Class sizes are small so you will benefit from the one-on-one attention they offer. You will gain comprehensive knowledge about the window tinting industry and learn about Johnson Window

Film products & performance. Students will graduate with certificates of completion and an assessment of their performance.

WHAT TO EXPECT

HOW GOOD OF AN INSTALLER WILL I BE?

There is no doubt about it; proper window film installation is a trade! Qualified installers make it "look easy," but if this was the case everybody would be doing it. Our class will give you the knowledge and confidence to become a pro. Our close supervision and your dedication and attention will ensure that you absorb our specific methods and send you down the road to success!

If you are already installing; the intermediate and advanced courses will introduce you to new techniques that you may not have had access to. Our specialized drills will increase your speed and our access to the most innovative approaches will dramatically benefit your efficiency!

WILL I KNOW IF I'M GETTING IT?

Yes. Each student will be given daily feedback and an assessment showing their individual progress. We give an honest assessment of their skill levels and tailor the supervision to work on and overcome any difficulties.

IS THERE AN INDUSTRY CERTIFICATION?

While there is no current industry certification, Johnson Window Films University will issue a "Certificate of Completion" at the end of the course. You will also get an industry guide to study for the International Window Film Association [IWFA] "Solar Control Specialist" accreditation exam.

WHAT YOU LEARN

- Use of Installation Tools
- Proper Job Prep
- Installation Skills
- Solar Control Terminology
- Pattern Shrinking
- How Window Film is Made
- Film Product Knowledge
- Industry Overview
- Tint Laws
- Inventory Control
- Estimating Methods
- How to Make the Sale

AVAILABLE COURSES

101 Basic Automotive

The goal of this class is to teach a basic knowledge of window film's construction & proper use while providing enough hands-on practice to gain skills required for basic installations on automotive windows.

201 Intermediate Automotive

The goal of this class is to take your skills from the beginner level to the "installer" level. You should be able to complete difficult cars in 4 hours or less. You will learn skills which will bring your installs down to 2 hours with a few weeks continued practice. You will be able to do all but the most difficult cars at your own pace.
Prerequisites: 101 Basic Automotive Window Tinting or 2 months at a tint shop with owner's recommendation.

120 Automotive 2-Week Combination Class

This course is given over a two week period. The first week is our Basic Automotive and the second is the Intermediate Level. After completion of both courses, the successful student will be able to perform installation on almost any vehicle that comes in the door.
