Trident™ and Defendor™

All clear Trident & Defendor films are suitable for all glass types. Solar control Trident films (S4DN35, S4DN20, S4SS35 and S4SS20) have the same coverage as their corresponding standard solar control film (i.e. S4SS35 = SS35).

Note: Any building with 2,000 sq. ft. or more of window film to be installed will also require pre-approval, regardless of film or glass type to be eligible for glass breakage or seal failure warranty coverage.

LIMITATIONS AND RESTRICTIONS

In the event that glass breakage or seal failure occurs as a direct result of properly installed Johnson window film, Johnson will arrange to replace the broken glass or IG unit. **There is a limitation in coverage of five hundred dollars (\$500.00 USD) per window with a twenty five dollar (\$25.00 USD) deductible per window. Coverage limits include the cost of window film re-installation.**

This warranty is NOT valid for glass breakage if any of the following conditions apply:

- ⊘ Up to 25% of the glass is shaded including more than 25% of the glass perimeter.
- ⊘ Glass with an edge dimension exceeding 10 feet.

With respect to this warranty coverage, JWF expressly limits liability from installation of Johnson films to repair and/or replacement of broken glass, IG units and the film itself to a limit of \$500 per window. The

warranty is valid within the United States and its Territories and the Provinces of Canada. Some states do not allow limitations of incidental or consequential damages, in which case the above may not apply.
